OBJECTIVE

MERN Stack Software Developer with 1+ year of hands-on experience across the full stack — from React.js front-ends to Node.js/Express APIs and MongoDB data layers. Seeking full-time Software Developer / MERN Stack Developer roles where I can contribute to production applications from day one.

EDUCATION

Master of Computer Applications, Chandigarh University, Mohali, Punjab Aug 2024 – Jun 2026

Bachelor of Computer Applications, DAV College, Abohar, Punjab Sep 2019 – Jul 2022

SKILLS

Frontend: HTML, CSS, JavaScript, jQuery, React.js, Bootstrap

Backend: Node.js, Express.js, RESTful API Design, JWT Authentication

Database: MongoDB (CRUD, Indexing, Data Modeling), MySQL

Other: Java, Git, Docker

EXPERIENCE

Software Developer Aug 2025 – Jun 2026

ChromelInfotech — Building-management web application (tenant service requests, conference room booking, facility queries)

- Implemented JWT-based authentication and authorization for 400+ active users, eliminating unauthorized-access incidents and standardizing session handling across the application.
- Designed and maintained 20+ RESTful API endpoints powering tenant service requests and room bookings, supporting roughly 200 daily requests with 99%+ uptime.
- Optimized slow-running MongoDB queries and API logic, cutting average response time by ~30% and improving page-load experience for end users.
- Partnered with a 6-person development team in daily stand-ups and code reviews to debug production issues, cutting the average bug-resolution time from days to under 24 hours.
- Built and maintained MongoDB data models covering CRUD operations and indexing across 10 collections, keeping facility and tenant records consistent and query-efficient.
- Manually tested all API endpoints in Postman prior to integration, reducing front-end integration bugs and rework by an estimated 25%.

PROJECTS

- **Employment History Management** — Built a Node.js/Express.js application for securely uploading and managing employment documents for 100+ records, using JWT authentication and file-storage libraries to keep sensitive data protected.
- **ServiceLink** — Developing a MERN-stack marketplace connecting service providers (electricians, plumbers, etc.) with users seeking their services, including provider search, booking, and profile management.

ACHIEVEMENTS

- Employee of the Quarter, ChromelInfotech — recognized among 15+ team members for outstanding performance and contribution to the development team.

ADDITIONAL INFORMATION

Certifications: Full Stack Development, UpGrad

Languages: English, Hindi, Punjabi
